For decades, Key Biscayne has defined exclusivity. Its island beauty, village ease and beach clubs have always painted the ideal picture for those who value intimacy as much as luxury.

Oceana was envisioned with the culture of exclusivity in mind. It was then reimagined for the modern elite.

Discover the newest condominium residences to be built on Key Biscayne in nearly a decade. Own a rare opportunity for a modern home in one of Miami’s most distinguished communities.
Dear Sir or Madam,

I would like to personally introduce you to my latest residential project, Oceana Key Biscayne. From concept to completion, these luxury condominiums and villas will reflect the union of two of my biggest passions, art and real estate.

In addition to being a collector and patron of fine art, I am also known for my personal method of selecting pieces of art. I aim to discover the best artistic moment of the artist and their best piece, and I bring that same philosophy to real estate.

That is how I see Oceana Key Biscayne: As the last available piece of paradise on Key Biscayne, Florida, with the finest in architecture, interior design, landscape and construction quality.

I hope you appreciate its rare beauty as deeply as I do and the captivating moment spent in the tranquility of this exclusive environment. To step into Oceana Key Biscayne is to step into a priceless work of art.

I hope you and your family choose to make it your own.

Sincerely yours,

Eduardo Costantini

Walking the fine line between edgy and elegant, Yabu Pushelberg artfully reconciles opposites. George Yabu founded the Toronto firm with Glenn Pushelberg in 1980, after graduating from Ryerson Polytechnic. Both launched their careers with private practices: Yabu in residential design and Pushelberg in retail. They later fortuitously met and opened their joint studio, now headquartered in New York. The duo’s design compatibility is grounded in a shared commitment to experimenting with materials, processes and ideas.

This innovative approach has garnered numerous accolades for Yabu Pushelberg. These include a coveted James Beard Foundation design award as well as the International Hotel/Motel & Restaurant Show’s Gold Key Award for Excellence in Hospitality Design.

Stated dimensions are measured to the exterior boundaries of the exterior walls and the centerline of interior demising walls and in fact vary from the dimensions that would be determined by using the description and definition of the "Unit" set forth in the Declaration (which generally only includes the interior airspace between the perimeter walls and excludes interior structural components). For the square footage of the "Unit" calculated in the manner set forth in the Declaration, see Exhibit "5" to the Declaration. Additionally, measurements of rooms set forth on any floor plan are generally taken at the greatest points of each given room (as if the room were a perfect rectangle), without regard for any cutouts. Accordingly, the area of the actual room will typically be smaller than the product obtained by multiplying the stated length times width. All dimensions are approximate, and all floor plans and development plans are subject to change.
